High-pressure switch for gas, air, flue gases and combustion products

GW 500 A4 GW...A4 HP GW...A4/2 HP **DUNGS®**

5.04

Technical description

The GW...A4 pressure switch is an adjustable pressure switch for burners. It is suitable for closing, opening or switching over a current circuit when the actual pressure value deviates from the specified pressure setpoint. The specified pressure setpoint (operating point) is set at a setting wheel using a scale.

Application

Pressure monitoring in burner control systems

Suitable for gases of gas families 1,2,3 and other neutral gaseous media, as well as air, flue gases and combustion products.

GW 500 A4: Free of non-ferrous metals, suitable for gases up to max. 0.1 % by vol. H₂S, dry.

Approvals

EU type test approval as per EC Gas Appliance Directive:

GW...A4 CE-0085 AO 3220

EU type test approval as per EC Pressure Equipment Directive:

GW...A4 CE0036

Approvals in other important gas-consuming countries.

Functional

Pressure switch for applications involving excess pressure.

GW 500 A4

The pressure switch acts via a rubber diaphragm against the force of the setting spring on the micro-switch.

GW...A4 HP

The pressure counteracts the force of the setting spring on the micro-switch via the metal bellows. The pressure switch does not require power assistance.

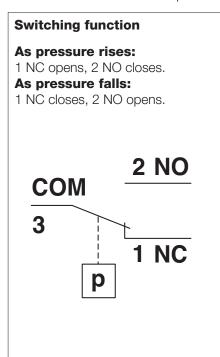

Pressure switch GW...A4

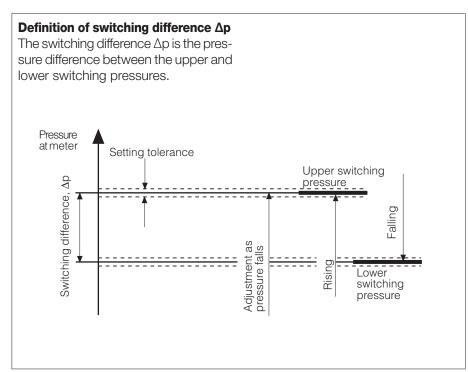

The switching mechanism reacts to overpressure and closes, opens or switches over a current circuit when the specified pressure setpoint is overshot or undershot.

Metal bellows (only GW...A4 HP)

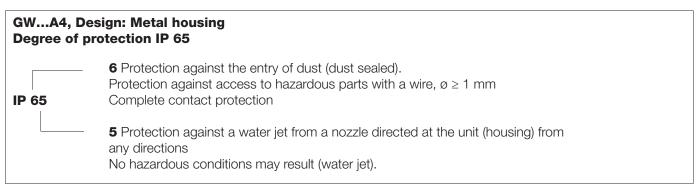

All gas-carrying parts are made of 1.4541 stainless steel and, therefore, are suitable for:

- applications involving operating pressures greater than 600 mbar
- biogas applications
- aggressive media such as sulphuric acid up to a concentration of 1.0 % by vol.

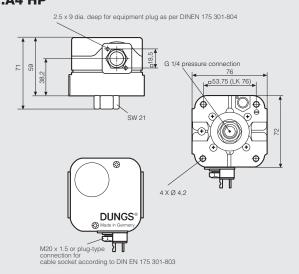

GW...A4, Design: Clear cover Degree of protection IP 54 5 Protection against ingress of solid particles Ø ≥ 1 mm Protection against access to hazardous parts with a wire, Ø ≥ 1 mm Complete contact protection 4 Protection against a water jet. No hazardous conditions may result.

Installation position

Standard installation position; if a different installation position is used, pay attention to the changed operating points:

GW 500 A4 approx. ± 5 mbar GW 500 A4 HP approx. ± 10 mbar GW 2000 A4 HP approx. ± 20 mbar GW 6000 A4 HP approx. ± 80 mbar

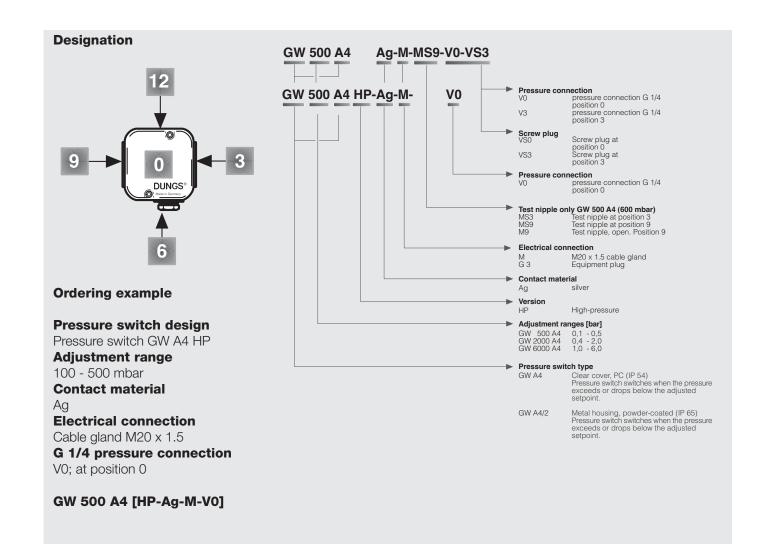

When installed horizontally, the pressure switch switches at a pressure higher

When installed horizontally overhead, the pressure switch switches at a pressure lower

When installed at an intermediate position, the pressure switch responds if there is maximum upper or lower pressure deviation w.r.t. the set pressure reference value.

Accessories for pressure switches GWA4	Order No.
